Recovering Our Traditions

4th National Congress on Palliative Care

Presented by the Supportive Care Coalition and Catholic Health Association of the United States

October 28-30, 2010 • Marriott Union Station • St. Louis, Missouri

About the Congress

This important event will focus on current trends, recent developments and best practices in palliative and supportive care. A wide range of plenary and concurrent sessions will address timely topics such as the impact of chronic disease and long-term care on palliative care; responding to vulnerable populations; interdisciplinary team dynamics and improving team function for patient/family

care; palliative care in the context of Catholic health care and the Catholic moral tradition; and ways that the palliative medicine sub-specialty, certification processes and quality measures will advance palliative care into the future. Participants will be prepared to integrate learnings into the educational and program development strategies of their own practice environments.
